Dr. Anand Kumar
HOD Medicine, City General Hospital, Delhi

FAQ

What is TatvaPractice?+
TatvaPractice is an AI-powered cloud-based practice management and EMR system designed for Indian doctors, clinics, and hospitals. It includes smart prescriptions, appointment management, billing, patient records, and 20+ integrated modules.
How does AI-powered prescription work?+
TatvaPractice offers four AI prescription modes: VoiceRx (voice-to-prescription), SnapRx (photo-to-prescription), AmbientRx (conversation-to-notes), and manual entry. Each mode uses AI to structure, validate, and auto-populate prescriptions in seconds.
Is TatvaPractice ABDM compliant?+
Yes. TatvaPractice is fully integrated with ABDM (Ayushman Bharat Digital Mission) and supports ABHA ID creation, health record linking, and consent-based data sharing as per

government guidelines.
Can I use it for my hospital or chain of clinics?+
Absolutely. TatvaPractice supports multi-location, multi-department setups with role-based access, centralized reporting, and enterprise-grade security. Contact our sales team for custom plans.
Is there a free trial?+
Yes — we offer a 7-day free trial with full access to all features including AI prescription modes, appointment management, and billing. No credit card required.
What support do you provide?+
We provide dedicated onboarding support, in-app chat, email, and phone support. Enterprise clients get a dedicated account manager and priority SLA-based support.

Trusted by Clinic Doctors Across India

“I was writing prescriptions by hand for 18 years. TatvaPractice changed everything — my patients get printed Rx, I save 20 minutes a day, and my billing is finally organised.”

D
Dr. Priya Sharma
General Physician, Sharma Clinic, Pune
“The scheduling and reminder system alone paid for itself. My no-show rate dropped from 25% to under 10% in the first month. The whole team loves it.”
D
Dr. Rakesh Mehta
Pediatrician, Little Stars Clinic, Ahmedabad
“As a solo practitioner, I needed something simple that just works. TatvaPractice is exactly that — no bloat, no complexity. I was up and running the same afternoon.”
D
Dr. Ananya Iyer
Dermatologist, SkinFirst Clinic, Bangalore

Frequently Asked Questions

How much does TatvaPractice cost for a solo clinic?+
TatvaPractice offers a free tier for solo practitioners with core features including scheduling, digital Rx, and basic patient records. Paid plans with advanced analytics, billing, and multi-user support start at affordable monthly rates. Contact us for current pricing.
How long does it take to set up?+
Most clinics are up and running within 15 minutes. Simply sign up, configure your clinic profile, and start seeing patients. Our onboarding team provides free setup assistance and training for the first 30 days.
Can I import my existing patient data?+
Yes. TatvaPractice supports bulk import from Excel, CSV, and common EMR formats. Our team can also assist with data migration from legacy systems at no extra charge.
Does it work offline or on mobile?+
TatvaPractice is cloud-based and works on any device with a browser — laptop, tablet, or smartphone. Core features like prescription writing also work offline and sync automatically when connectivity is restored.

Purpose-built for hospital complexity

Six pillars of enterprise functionality designed for multi-department, multi-location healthcare organisations with rigorous compliance needs.
🏢

Multi-Department Management

Deploy across OPD, IPD, pharmacy, lab, radiology, and more with specialty-specific workflows and a unified patient record.
🔐

Role-Based Access Control

Granular permissions for doctors, nurses, admin, and management. Control who sees what across departments and locations.
📊

Centralised Reporting

Real-time dashboards aggregating clinical, operational, and financial data across every department and location in one view.
🔗

ABDM Integration

Fully certified ABDM integration with ABHA ID creation, health record linking, and consent-based data sharing out of the box.
📝

Audit Trail & Compliance

Tamper-proof audit logs for every clinical action. Meet NABH, ABDM, and internal governance requirements with zero manual effort.
🤝

Dedicated Support

Named account manager, 24/7 priority support, on-site training, and a dedicated implementation team for every deployment.

Enterprise Deployment
Structured rollout for hospitals
Phased RolloutOn-Site TrainingData Migration
How We Deploy

A proven deployment model — live in 4 weeks.

Our enterprise team works alongside your hospital staff to ensure a smooth, phased rollout. From infrastructure audit to go-live, every step is planned and supported.

- ✓ Week 1: Infrastructure audit and system configuration
- ✓ Week 2: Data migration, integrations, and role setup
- ✓ Week 3: Staff training across all departments
- ✓ Week 4: Go-live with on-site support and monitoring

Explore Enterprise Features → → 0% Documentation Time Saved 0% ABDM Compliance 0wk Avg Deployment Time 0.0% Uptime SLA

Trusted by Hospital Leaders

"We evaluated five EMR platforms before choosing TatvaPractice. The multi-department architecture and ABDM integration were head and shoulders above everything else. Rollout across 12 departments took just 3 weeks."
D
Dr. Suresh Nair
Medical Director, City General Hospital, Chennai
"Our compliance team was sceptical at first, but the audit trail and role-based access control won them over. We passed our NABH re-accreditation with zero documentation gaps for the first time."
K
Kavitha Reddy
Hospital Administrator, MedPlus Health Network, Hyderabad
"Managing three hospital locations used to mean three different systems and no unified view. TatvaPractice gave us one dashboard for everything — clinical, operational, and financial."
R
Rajiv Kapoor
CEO, LifeBridge Hospitals, Delhi NCR

Enterprise FAQ

Can TatvaPractice handle multiple hospital locations?+
Yes. TatvaPractice Enterprise supports unlimited locations with centralised management, unified patient records, and cross-location reporting. Each location can have its own department structure and user roles while sharing a single source of truth.
How does ABDM integration work?+

TatvaPractice is fully ABDM-certified. We handle ABHA ID creation, health record linking, consent management, and data sharing natively — no third-party middleware required. Compliance is automatic for every clinical interaction.
What does the deployment process look like?+
Our standard enterprise deployment follows a 4-week phased model: infrastructure audit, data migration and configuration, staff training, and go-live with on-site support. Larger networks may require a customised timeline. A dedicated implementation manager is assigned to every deployment.
What kind of support is included for enterprise customers?+
Enterprise plans include a named account manager, 24/7 priority support via phone and chat, quarterly business reviews, on-site training sessions, and a 99.9% uptime SLA. Custom SLAs and dedicated infrastructure are available for large networks.

Feature — VoiceRx

URL: `/features/voicerx`

AI Prescription Mode

Speak it.

Done. Dictate prescriptions in any language. VoiceRx transcribes, structures, and auto-populates medications in real-time — turning a 3-minute prescription into a 12-second voice command. Try VoiceRx Free →Watch Demo 🎤 VoiceRx Voice-to-Prescription AI Multi-LanguageReal-TimeOffline ReadyDrug Checks 0s Avg Prescription Time 0% Transcription Accuracy 0+ Languages Supported 0K+ Drugs in Database Core Capabilities

Everything You Need to Prescribe by Voice

VoiceRx combines medical-grade speech recognition with a comprehensive drug database and real-time clinical validation.
🌐

Multi-Language Support

Dictate prescriptions in Hindi, English, Tamil, Bengali, or any regional language. VoiceRx understands medical terminology across languages and scripts.
⚡

Real-Time Transcription

See your words convert to structured prescriptions as you speak. No waiting, no lag — instant

clinical documentation at the speed of thought.

💊

Auto-Fill Drug Database

As you dictate, VoiceRx auto-suggests drug names, dosages, and formulations from a curated database of 100,000+ medicines available in India.

📴

Offline Mode

No internet? No problem. VoiceRx works fully offline with on-device processing, syncing automatically when connectivity returns.

🛡️

Drug Interaction Alerts

Real-time alerts for contraindications, duplicate therapies, and dosage warnings as you dictate — catching errors before they reach the patient.

📋

Smart Templates

Specialty-specific voice templates that learn your prescribing patterns over time, making repeat prescriptions faster with each use.

🎤

VoiceRx
Voice-to-Prescription
HindiEnglishTamilBengali10+ Languages
How It Works

From spoken word to structured prescription in seconds

VoiceRx uses a purpose-built medical NLP engine that understands clinical context, not just words. Speak naturally in any supported language, and watch your prescription take shape in real-time.

- ✓ Tap the microphone and start speaking naturally
- ✓ VoiceRx transcribes and structures your words in real-time
- ✓ Drug names, dosages, and instructions are auto-populated
- ✓ Review, edit if needed, and finalize with one tap

Explore TatvaPractice → → 🧠 Medical NLP Clinical Intelligence Clinical Accuracy

Built for medical precision, not general dictation

Unlike generic voice assistants, VoiceRx is trained exclusively on clinical data. It understands medical shorthand, drug abbreviations, and specialty-specific terminology — delivering

pharmacopeia-grade accuracy every time.

- ✓ Trained on 10M+ Indian clinical consultations
- ✓ Context-aware medical NLP — understands shorthand and abbreviations
- ✓ Continuous learning from doctor corrections and feedback
- ✓ Validated against pharmacopeia for drug name accuracy

Built for Every Clinical Scenario

Whether it is a routine OPD consultation or a complex multi-drug prescription, VoiceRx adapts to your workflow.

High-Volume OPD

See 50+ patients a day without compromising on documentation. VoiceRx keeps up with even the busiest clinics.

Pediatrics & Dosing

Weight-based dosage calculations and age-appropriate formulations are automatically suggested as you dictate.

Home Visits & Camps

Offline mode ensures VoiceRx works at health camps, home visits, and rural areas with limited connectivity.

VoiceRx FAQ

Which languages does VoiceRx support?+
VoiceRx supports Hindi, English, Tamil, Telugu, Bengali, Marathi, Gujarati, Kannada, Malayalam, and Punjabi. Our AI is trained on medical terminology across all supported languages, including code-switching between Hindi and English.
Does VoiceRx work without an internet connection?+
Yes. VoiceRx includes a fully functional offline mode that processes speech on-device. Prescriptions created offline are automatically synced to the cloud when connectivity returns, ensuring zero data loss.
How accurate is the voice-to-prescription transcription?+
VoiceRx achieves over 97% accuracy on medical terminology, trained on more than 10 million Indian clinical consultations. The system continuously improves by learning from doctor corrections and specialty-specific patterns.
Can VoiceRx handle complex multi-drug prescriptions?+
Absolutely. VoiceRx handles multi-drug prescriptions with ease, automatically structuring each

medication with drug name, dosage, frequency, duration, and special instructions. It also runs real-time drug interaction checks across all prescribed medications.

Feature — SnapRx

URL: `/features/snaprx`

AI Prescription Mode

Photograph it.

Digitized. Point your camera at any handwritten prescription. SnapRx uses healthcare-grade OCR to extract drug names, dosages, and instructions — converting paper to structured data in seconds. Try SnapRx Free →See It in Action 📸 SnapRx Photo-to-Prescription AI OCR EngineDrug ExtractionMulti-ScriptEHR Ready 0% Extraction Accuracy 0M+ Prescriptions Trained On 0s Avg Processing Time 0K+ Drugs Cross-Referenced Core Capabilities

From Paper to Pixel — Accurately

SnapRx is not a generic scanner. It is a medical document intelligence engine built specifically for the messy reality of handwritten prescriptions.

🔍

Healthcare-Grade OCR

Purpose-built optical character recognition trained on millions of handwritten Indian prescriptions — not generic document scanning, but clinical-grade extraction.

💊

Drug Name Extraction

Identifies and maps drug names to a standardized pharmacopeia, resolving brand names, generics, and regional variants automatically.

📝

Abbreviation Handling

Understands medical shorthand like BD, TDS, OD, SOS, HS, and hundreds of clinical abbreviations used across Indian medical practice.

🔗

Cross-Referencing Engine

Every extracted drug is cross-referenced against a 100K+ drug database for dosage validation,

interaction checks, and formulary verification.
📐

Layout Intelligence

Understands prescription structure — headers, drug lists, dosage columns, instructions, and doctor signatures — regardless of formatting style.
🔄

Instant Digitization

Converts scanned prescriptions into fully editable, structured digital records that integrate directly into the patient EHR timeline.
📸
SnapRx
Photo-to-Prescription
HandwrittenPrintedThermalMulti-Format
How It Works

Capture, extract, and digitize in one seamless flow

SnapRx combines computer vision with medical NLP to understand not just the text on a prescription, but the clinical intent behind it. It knows that 'Tab Amox 500 BD x 5' means Amoxicillin 500mg twice daily for five days.

- ✓ Point your camera at the handwritten prescription
- ✓ SnapRx captures and enhances the image automatically
- ✓ AI extracts drug names, dosages, frequencies, and instructions
- ✓ Review the structured output, make edits if needed, and save to EHR

Explore TatvaPractice → → 🧠 Medical OCR Clinical Intelligence Clinical Accuracy

Trained on millions of real Indian prescriptions

Generic OCR fails on medical handwriting. SnapRx was built from the ground up for clinical documents — trained on 5 million+ handwritten prescriptions from doctors across India, covering every specialty and handwriting style.

- ✓ Trained on 5M+ handwritten Indian prescriptions across specialties
- ✓ Handles poor handwriting, smudged ink, and low-light captures
- ✓ Multi-script support — English, Hindi, and regional language prescriptions
- ✓ Confidence scoring highlights uncertain extractions for doctor review

Where SnapRx Makes the Difference

From pharmacy counters to insurance claims, SnapRx turns illegible prescriptions into

actionable structured data.

💊

Pharmacy Dispensing

Pharmacists can scan incoming prescriptions to verify drug names and dosages instantly, reducing dispensing errors and improving turnaround.

🏥

Hospital Intake

Digitize referral prescriptions from outside doctors during hospital admissions, creating a complete medication history in the EHR.

📋

Insurance & Claims

Convert prescription documents into structured data for insurance claims processing, reducing rejection rates from illegibility.

SnapRx FAQ

How accurate is SnapRx at reading handwritten prescriptions?+
SnapRx achieves 95%+ accuracy on drug name extraction from handwritten prescriptions. It is trained specifically on Indian medical handwriting and continuously improves through feedback. Any low-confidence extractions are flagged for manual review, ensuring patient safety.
Can SnapRx read prescriptions in regional languages?+
Yes. SnapRx supports prescriptions written in English, Hindi, and Devanagari script. Support for Tamil, Telugu, Bengali, and other regional scripts is in active development and will be available in upcoming releases.
What happens if the handwriting is illegible?+
SnapRx uses confidence scoring for every extracted element. If a drug name, dosage, or instruction falls below the confidence threshold, it is highlighted in orange for the doctor to review manually. The system never auto-confirms uncertain extractions.
Does SnapRx work with printed prescriptions too?+
Absolutely. While SnapRx is optimized for handwritten prescriptions, it handles printed and typed prescriptions with near-perfect accuracy. It also works with thermal printer outputs, lab reports, and discharge summaries.

Digitize Every Prescription Instantly

Try SnapRx free for 7 days. Photograph any prescription, and watch it transform into structured clinical data. Request a Demo →Learn more

Feature — SmartSync

URL: `/features/smartsync`

Cloud Infrastructure

Your data,

everywhere. SmartSync ensures your patient records, prescriptions, and practice data are always up-to-date across every device — even when you are offline. Seamless, encrypted, and ABDM-ready. Get Started Free →View Architecture 🔄 SmartSync Seamless Data Synchronization Real-TimeOffline-FirstEncryptedABDM Ready 0.00% Uptime SLA 0ms Avg Sync Latency 0-bit AES Encryption 0 days Point-in-Time Recovery Core Capabilities

Always in Sync. Always Secure.

SmartSync is the invisible infrastructure that makes TatvaPractice work seamlessly across devices, locations, and network conditions.

🔄

Real-Time Sync

Changes propagate instantly across all connected devices. Update a patient record on your phone, and it appears on your desktop within milliseconds.

📴

Offline-First Architecture

Work without internet — SmartSync queues all changes locally and resolves conflicts intelligently when connectivity returns. Zero data loss, guaranteed.

🏛️

ABDM Integration

Seamlessly syncs patient records with the Ayushman Bharat Digital Mission ecosystem, including ABHA IDs, health lockers, and consent-based data exchange.

💾

Auto-Backup & Recovery

Continuous encrypted backups to the cloud with point-in-time recovery. Restore your entire practice data from any moment in the last 90 days.

🔒

End-to-End Encryption

AES-256 encryption at rest and TLS 1.3 in transit. Your patient data is encrypted before it leaves the device and remains encrypted in the cloud.

🗄️

Multi-Location Support

Sync data across multiple clinic branches seamlessly. Staff at one location can access shared patient records from any other branch in real-time.

🔄

SmartSync
Data Synchronization
PhoneTabletDesktopCloud
How It Works

Invisible sync that just works

SmartSync operates silently in the background, ensuring that every prescription, appointment, and patient note is replicated across your devices in real-time. When you go offline, it queues changes locally and replays them seamlessly when connectivity returns.

- ✓ SmartSync runs silently in the background on all your devices
- ✓ Every change is timestamped, encrypted, and queued for sync
- ✓ Conflict resolution engine merges concurrent edits intelligently
- ✓ Data is mirrored to the cloud with continuous encrypted backups

Explore TatvaPractice → → 🛡️ Infrastructure Security & Compliance Security & Compliance

Enterprise-grade infrastructure, built for Indian healthcare

SmartSync runs on India-region cloud infrastructure designed for healthcare workloads. Every byte is encrypted, every access is logged, and every sync is auditable — meeting the highest standards of Indian data protection law and ABDM compliance.

- ✓ Hosted on HIPAA-compliant, India-region cloud infrastructure
- ✓ Automatic failover with 99.99% uptime SLA for enterprise plans
- ✓ Incremental sync — only changed data is transferred, saving bandwidth
- ✓ Role-based access control ensures staff see only what they need

Built for Real-World Practice

From single-doctor clinics to multi-branch hospitals, SmartSync adapts to your infrastructure needs.

🏠

Solo Practitioners

Sync between your clinic desktop and personal phone. Access patient records on the go, even during home visits without internet.

🏥

Multi-Branch Clinics

Shared patient database across branches with centralized reporting. Staff at any location can pull up records instantly.

🚑

Field & Camp Settings

Offline-first design ensures full functionality at health camps, rural outreach, and mobile clinics with intermittent connectivity.

SmartSync FAQ

What happens when there is a conflict between two devices?+
SmartSync uses a timestamp-based conflict resolution engine with field-level granularity. If two users edit different fields of the same record simultaneously, both changes are preserved. For same-field conflicts, the most recent change wins, and the overwritten value is saved in an audit log for review.
How does offline mode work?+
SmartSync uses an offline-first architecture where all data is stored locally on your device. When you work without internet, all changes are queued in a local transaction log. When connectivity returns, SmartSync replays the queue in order, resolving any conflicts automatically. You never lose data.
Is SmartSync compliant with Indian data protection regulations?+
Yes. SmartSync is fully compliant with the Digital Personal Data Protection Act (DPDPA) and ABDM data standards. All patient data is stored within India, encrypted at rest and in transit, and accessible only through consent-based mechanisms.
Can I sync data across multiple clinic branches?+
Absolutely. SmartSync supports multi-location practices with shared patient databases, inter-branch referrals, and centralized reporting. Each branch operates independently when offline and syncs seamlessly when connected.

Your Data, Always Available

SmartSync comes built into every TatvaPractice plan. Start syncing across all your devices today.

Zyvelor AI

AI that thinks

alongside you. Doctor Agent is your AI clinical assistant — providing real-time differential diagnoses, drug interaction alerts, lab interpretation, and evidence-based treatment suggestions

right inside your consultation workflow. Try Doctor Agent Free →View Clinical Demo 🧠 Doctor Agent AI Clinical Assistant DDx EngineDrug AlertsLab AIEvidence-Based 0K+ Conditions Covered 0K+ Drug Interactions Tracked 0s Avg DDx Response Time 0+ Clinical Guidelines Integrated Clinical Intelligence

Your AI-Powered Second Opinion

Doctor Agent combines medical knowledge graphs, clinical guidelines, and real-time patient data to surface the insights that matter most during every consultation.

🧬

Differential Diagnosis Engine

Enter symptoms, vitals, and history — get a ranked list of differential diagnoses with probability scores, supporting evidence, and recommended workup for each.

⚠️

Drug Interaction Alerts

Real-time screening of all prescribed medications against a comprehensive interaction database. Flags contraindications, duplicate therapies, and dosage concerns before you finalize.

🔬

Lab Report Interpretation

Upload lab reports and get AI-powered interpretation with clinical context — abnormal values highlighted, trends tracked over time, and differential implications explained.

📚

Evidence-Based Suggestions

Treatment suggestions linked to current clinical guidelines, peer-reviewed literature, and Indian medical protocols. Every recommendation comes with a citation trail.

📊

Patient Risk Scoring

Continuous risk stratification using patient history, comorbidities, medications, and lab trends. Proactively identifies patients who need closer monitoring.

💬

Clinical Query Assistant

Ask clinical questions in natural language and get evidence-backed answers instantly. From drug dosages to diagnostic criteria — your medical knowledge base at hand.

🧠

Doctor Agent
Clinical Assistant
DDxDrug SafetyLab AIGuidelines
How It Works

Contextual intelligence, not interruptions

Doctor Agent does not bombard you with alerts. It watches the clinical context silently and surfaces relevant suggestions only when they add value — a potential missed diagnosis, a critical drug interaction, or a guideline-recommended workup you might want to consider.

- ✓ Doctor Agent runs alongside your consultation workflow automatically
- ✓ It analyzes symptoms, vitals, medications, and patient history in real-time
- ✓ Differential diagnoses, alerts, and suggestions appear as contextual cards
- ✓ Accept, dismiss, or modify recommendations — the AI learns from your decisions

Explore TatvaPractice →→ 📚 Knowledge Engine Medical Intelligence Knowledge Base

15,000+ conditions. 100,000+ drugs. Always current.

Doctor Agent draws from a continuously updated medical knowledge graph covering conditions, medications, interactions, lab values, and clinical pathways. Every suggestion is backed by evidence — and every evidence trail is traceable to its source.

- ✓ Knowledge base covers 15,000+ conditions and 100,000+ drugs
- ✓ Updated continuously with latest clinical guidelines and drug approvals
- ✓ Specialty-aware — adapts suggestions to your field of practice
- ✓ Learns from your diagnostic patterns to provide increasingly relevant support

Real Clinical Scenarios, Real Impact

Doctor Agent adds value across every stage of the clinical encounter — from initial assessment to treatment planning.

🩺

Complex Differentials

A patient presents with atypical chest pain. Doctor Agent ranks cardiac, GI, musculoskeletal, and anxiety-related causes by probability, suggesting targeted workup for each.

💊

Polypharmacy Safety

An elderly patient on 8+ medications. Doctor Agent screens every new prescription against existing drugs, flagging interactions the busiest clinician might miss.

🔬

Lab Trend Analysis

HbA1c trending upward over three visits. Doctor Agent highlights the trend, correlates with current medications, and suggests guideline-based escalation options.

Doctor Agent FAQ

Does Doctor Agent replace clinical judgment?+
Absolutely not. Doctor Agent is a decision-support tool, not a decision-making tool. It provides evidence-based suggestions, differential diagnoses, and alerts — but every clinical decision remains with the physician. Think of it as a highly knowledgeable colleague offering a second opinion in real-time.
How current is the medical knowledge base?+
Doctor Agent's knowledge base is updated monthly with the latest drug approvals, clinical guideline revisions, and evidence from peer-reviewed literature. Drug interaction databases are updated weekly. All sources are cited and traceable.
Can Doctor Agent handle specialty-specific cases?+
Yes. Doctor Agent adapts to your specialty — whether you practice cardiology, pediatrics, dermatology, or general medicine. It adjusts its differential diagnosis rankings, drug suggestions, and clinical pathways based on your specialty context and patient demographics.
Is patient data used to train the AI?+
No. Patient data is never used for model training. Doctor Agent uses de-identified clinical patterns for improving its algorithms, but individual patient records are processed in real-time and never stored for training purposes. All processing complies with DPDPA regulations.

Smarter Decisions. Better Outcomes.

How It Works

From booking to follow-up — fully automated

Receptionist AI manages the entire appointment lifecycle. Patients book through their preferred channel, receive automated confirmations and reminders, check in digitally on arrival, and get follow-up messages after their visit — all without manual intervention.

- ✓ Patient requests an appointment via call, WhatsApp, or the online portal
- ✓ Receptionist AI finds the optimal slot based on doctor schedule and patient history
- ✓ Confirmation and reminders are sent automatically via the patient's preferred channel
- ✓ On the day, the digital queue manages check-in, tokens, and wait-time updates

80% of front-desk work, handled by AI

Receptionist AI is not a simple chatbot. It understands appointment context, patient history, doctor preferences, and clinic workflows. It learns your practice patterns over time — optimizing scheduling, predicting no-shows, and proactively managing capacity.

- ✓ Handles 80% of front-desk interactions without human intervention
- ✓ Learns peak hours and seasonal patterns to optimize scheduling
- ✓ Multi-channel support — WhatsApp, SMS, phone, and web portal
- ✓ Seamlessly escalates complex requests to human staff with full context

Designed for Every Practice Type

Whether you run a solo clinic or a multi-specialty hospital, Receptionist AI scales to match your front-desk needs.

🏠

Solo Clinics

Run your front desk without dedicated staff. Receptionist AI handles bookings, reminders, and walk-in management — letting you focus entirely on patient care.

🏥

Multi-Doctor Practices

Coordinate schedules across multiple doctors, rooms, and appointment types. The AI optimizes slot allocation to balance workload and minimize patient wait times.

🏢

Hospital OPDs

Manage high-volume outpatient departments with digital queue tokens, real-time wait-time displays, and automated patient flow across departments.

Receptionist AI FAQ

Will Receptionist AI replace my front-desk staff?+
No — it augments them. Receptionist AI handles repetitive tasks like appointment confirmations, reminders, and queue updates, freeing your staff to focus on patient interactions that require a human touch. Most clinics find their staff become more productive, not redundant.
How does the AI handle appointment rescheduling?+
Patients can reschedule via WhatsApp, SMS reply, or the patient portal. Receptionist AI finds the next available slot that matches the patient's preferences, confirms the change, and updates the doctor's calendar — all without staff involvement. Cancellation policies and buffer times are fully configurable.

Can I customize the reminder messages and timing?+
Yes. You have full control over reminder content, timing, frequency, and channels. Set different reminder schedules for different appointment types — for example, a 24-hour reminder for routine visits and a 48-hour reminder for procedures that require preparation.
Does Receptionist AI integrate with WhatsApp Business?+
Yes. Receptionist AI integrates with WhatsApp Business API for appointment booking, confirmations, reminders, and follow-up campaigns. Patients can interact with the AI naturally over WhatsApp, and all conversations are logged in the practice dashboard.

Our Story

Building the future of

healthcare. Digicare Health Solutions is on a mission to make quality healthcare accessible, affordable, and intelligent for every Indian — powered by AI and built with empathy. Get in Touch →Join Our Team Our Mission

Empowering every doctor with technology that truly helps.

We started with a simple belief: Indian doctors deserve modern, intuitive tools that let them focus on what matters most — patient care. Too many clinics still run on paper, too many hospitals struggle with fragmented systems, and too many patients fall through the cracks. TatvaPractice is our answer. A unified, AI-native platform that brings scheduling, prescriptions, records, billing, and patient engagement together in one place — designed for the way healthcare works in India.
Vision
To become the operating system for healthcare delivery in India — connecting doctors, patients, pharma, and payors on a single intelligent platform.
Mission
To digitise 500,000 doctors across India by 2028, reducing clinical burden through AI and making every patient interaction smarter, faster, and more connected.

Our Values

What we stand for

Four principles that shape every product we build, every team we grow, and every partnership we form.
🏥

Patient-First

Every product decision begins and ends with patient outcomes. Better tools for doctors mean better care for patients.
🧠

AI-Native

AI is not an add-on — it is the foundation. From VoiceRx to smart scheduling, intelligence is woven into every workflow.
IN

India-Built

Designed for Indian healthcare realities — multi-language support, ABDM compliance, GST billing, and pricing for every clinic size.
🔒

Data-Secure

Healthcare data is sacred. We maintain end-to-end encryption, role-based access, and full regulatory compliance.

Privacy Policy

URL: `/privacy`

Privacy Policy

Last updated: April 2026
Digicare Health Solutions Pvt. Ltd. (“Company”, “we”, “us”, or “our”) operates the TatvaPractice platform and related services. This Privacy Policy explains how we collect, use, disclose, and safeguard your information when you use our Services. We are committed to protecting the privacy and security of our users and their patients.
HIPAA CompliantABDM CertifiedISO 27001 Accredited

1. Information We Collect

We collect information you provide directly to us when using TatvaPractice, as well as information generated through your use of the Services.

Personal Information

- Name, email address, phone number, and professional credentials during account registration.
- Clinic or hospital name, address, and practice details.
- Billing information and payment details for subscription services.

Clinical Data

- Patient records, prescriptions, and medical notes created using VoiceRx, SnapRx, AmbientRx, and other platform features.
- Appointment schedules, billing records, and diagnostic information.
- Voice recordings (processed for transcription and deleted after processing unless explicitly saved).

Usage Data

- Device information, browser type, IP address, and operating system.
- Feature usage patterns, session duration, and interaction logs.
- Error reports and performance metrics to improve the Services.

2. How We Use Information

We use the information we collect for the following purposes:

- To provide, operate, and maintain the TatvaPractice platform and its features.
- To process and manage prescriptions, appointments, and clinical workflows.
- To power AI-assisted features such as VoiceRx transcription, the DDx Engine, and SmartSync integrations.
- To improve, personalize, and expand the Services based on usage patterns.
- To communicate with you, including sending service updates, security alerts, and support messages.
- To comply with legal obligations and enforce our terms of service.
- To detect, prevent, and address technical issues and security threats.

3. Data Storage & Security

We implement industry-leading security measures to protect your data:

- **Encryption:** All data is encrypted in transit (TLS 1.3) and at rest (AES-256).
- **Access Controls:** Role-based access controls (RBAC) ensure that only authorized personnel can access sensitive data.

- **Infrastructure:** Data is hosted on ISO 27001 certified cloud infrastructure with redundant backups across geographically separated data centers in India.
- **Audit Trails:** Comprehensive logging of all data access and modifications for compliance and security monitoring.
- **Regular Audits:** We conduct periodic security assessments, penetration testing, and vulnerability scans.

While we strive to use commercially acceptable means to protect your personal information, no method of transmission over the Internet or electronic storage is 100% secure. We cannot guarantee absolute security.

4. ABDM Compliance

TatvaPractice is fully compliant with the Ayushman Bharat Digital Mission (ABDM) framework. Our platform:

- Supports ABHA (Ayushman Bharat Health Account) ID verification and linking.
- Enables creation and sharing of health records conforming to ABDM data standards.
- Integrates with the Health Information Exchange & Consent Manager (HIE-CM) for consent-based data sharing.
- Follows all ABDM guidelines for data privacy, consent management, and interoperability.
- Supports Health Facility Registry (HFR) and Healthcare Professionals Registry (HPR) integration.

5. Third-Party Services

We may employ third-party companies and services to facilitate our Services. These third parties have access to your information only to perform specific tasks on our behalf and are obligated not to disclose or use it for any other purpose.

Categories of third-party services:

- **Cloud Infrastructure:** For secure data hosting and processing.
- **Payment Processing:** For handling subscription billing securely (we do not store full payment card details).
- **Analytics:** For understanding usage patterns and improving the Services (anonymized and aggregated data only).
- **Communication:** For sending transactional emails, SMS notifications, and WhatsApp messages.

6. Your Rights

You have the following rights regarding your personal data:

- **Access:** You can request a copy of the personal data we hold about you.
- **Correction:** You can request correction of any inaccurate or incomplete personal data.
- **Deletion:** You can request deletion of your personal data, subject to legal retention requirements.
- **Data Portability:** You can request your data in a structured, machine-readable format.
- **Withdrawal of Consent:** You can withdraw consent for data processing at any time, though this may affect your ability to use certain features.
- **Objection:** You can object to processing of your personal data for direct marketing purposes.

To exercise any of these rights, please contact us at privacy@tatvacare.in.

7. Data Retention

We retain your personal data only for as long as is necessary for the purposes set out in this Privacy Policy. We will retain and use your data to the extent necessary to comply with our legal obligations, resolve disputes, and enforce our policies.

- **Account Data:** Retained for the duration of your account and up to 90 days after account deletion.
- **Clinical Records:** Retained in accordance with applicable medical record retention laws (minimum 3 years from last consultation, or as required by law).
- **Usage Logs:** Retained for up to 12 months for analytics and security purposes.
- **Billing Records:** Retained for up to 7 years as required by Indian tax and accounting regulations.

8. Changes to This Policy

We may update our Privacy Policy from time to time. We will notify you of any changes by posting the new Privacy Policy on this page and updating the "Last updated" date at the top. You are advised to review this Privacy Policy periodically for any changes. Changes to this Privacy Policy are effective when they are posted on this page. Continued use of the Services after any modifications constitutes your acknowledgment of the modified Privacy Policy.

9. Contact Us

If you have any questions or concerns about this Privacy Policy or our data practices, please contact us: Digicare Health Solutions Pvt. Ltd. Bangalore & Ahmedabad, India Email: privacy@tatvacare.in For data protection inquiries, please allow up to 30 business days for a response.

Terms & Conditions

URL: `/terms`

Terms & Conditions

Last updated: April 2026

1. Acceptance of Terms

By accessing or using TatvaPractice and any related services (collectively, the "Services") provided by Digicare Health Solutions Pvt. Ltd. ("Company", "we", "us", or "our"), you agree to be bound by these Terms & Conditions. If you do not agree to all the terms and conditions of this agreement, you may not access or use the Services.
These Terms apply to all visitors, users, and others who access or use the Services, including healthcare providers, clinic administrators, and hospital staff.

2. Use of Services

TatvaPractice is an AI-powered practice management platform designed for healthcare professionals. You agree to use the Services only for lawful purposes and in accordance with these Terms.

You agree not to:

- Use the Services in any way that violates any applicable national or international law or regulation.
- Attempt to gain unauthorized access to, interfere with, damage, or disrupt any parts of the Services, the server on which the Services are stored, or any server, computer, or database connected to the Services.
- Use the Services to transmit, or procure the sending of, any advertising or promotional material without our prior written consent.
- Impersonate or attempt to impersonate the Company, a Company employee, another user, or any other person or entity.
- Use the platform to store, process, or transmit information that violates patient privacy laws.

3. User Accounts

When you create an account with us, you must provide information that is accurate, complete, and current at all times. Failure to do so constitutes a breach of the Terms, which may result in immediate termination of your account.
You are responsible for safeguarding the password that you use to access the Services and for any activities or actions under your password. You agree not to disclose your password to any third party and to notify us immediately upon becoming aware of any breach of security or

unauthorized use of your account.
We reserve the right to disable any user account at any time if, in our opinion, you have failed to comply with any provision of these Terms.

4. Intellectual Property

The Services and their original content, features, and functionality are and will remain the exclusive property of Digicare Health Solutions Pvt. Ltd. and its licensors. The Services are protected by copyright, trademark, and other laws of both India and foreign countries.
Our trademarks and trade dress may not be used in connection with any product or service without the prior written consent of Digicare Health Solutions Pvt. Ltd. All other trademarks not owned by us that appear on the Services are the property of their respective owners.

5. Privacy

Your use of the Services is also governed by our Privacy Policy. Please review our Privacy Policy, which also governs the Services and informs users of our data collection practices. By using the Services, you consent to the collection and use of information in accordance with our Privacy Policy.
We are committed to protecting patient data in compliance with HIPAA, ABDM (Ayushman Bharat Digital Mission) guidelines, and ISO 27001 information security standards. All clinical data is encrypted in transit and at rest.

6. Limitation of Liability

In no event shall Digicare Health Solutions Pvt. Ltd., nor its directors, employees, partners, agents, suppliers, or affiliates, be liable for any indirect, incidental, special, consequential, or punitive damages, including without limitation, loss of profits, data, use, goodwill, or other intangible losses, resulting from:

- Your access to or use of or inability to access or use the Services.
- Any conduct or content of any third party on the Services.
- Any content obtained from the Services.
- Unauthorized access, use, or alteration of your transmissions or content.

The AI-powered features of TatvaPractice, including VoiceRx, SnapRx, AmbientRx, and the DDx Engine, are designed to assist healthcare professionals and do not replace professional medical judgment. The Company is not liable for clinical decisions made using the platform.

7. Governing Law

These Terms shall be governed and construed in accordance with the laws of India, without regard to its conflict of law provisions. Any disputes arising under or in connection with these Terms shall be subject to the exclusive jurisdiction of the courts located in Bangalore, Karnataka, India.
Our failure to enforce any right or provision of these Terms will not be considered a waiver of

those rights. If any provision of these Terms is held to be invalid or unenforceable by a court, the remaining provisions of these Terms will remain in effect.

8. Contact Information

If you have any questions about these Terms & Conditions, please contact us: Digicare Health Solutions Pvt. Ltd. Bangalore & Ahmedabad, India Email: legal@tatvacare.in
